

Extension and Interface Cables

- Continuous flex cables can handle the high cycle requirements of many automation applications.
- Thin cables can be used when space is tight and multiple cables are required such as sensor boxes.
- Pin diagrams and other specifications can be found on our online product pages at: www.EMICorp.com
- See page 60 for OnRobot cables.
- See page 28 for Wingman cables & connectors.
- Additional cables and connectors on EMI's website.
- Contact us with any questions: Cobots@emicorp.com

Field Wireable Connectors

- Field wireable connectors provide a quick-disconnect and the ability to make custom length cables.
- Can be used in applications where a custom-built connections need to be added to cables.
- Pin diagrams and other specifications can be found on our online product pages at: www.EMICorp.com

M8 Angled Connectors with Screw Terminals:

#7810, Female 3-Pin

#7811, Male 3-Pin

M8 & 12 Straight Connector with Screw Terminals:

#7685, Male 8-Pin

#7284, Female 3-Pin

Insulation displacement connection: A type of wire termination in which the wire is punched down into a metal holder that cuts into the insulation wire and makes contact with the conductor, thus causing the electrical connection to be made. An advantage of this connection type is the insulation on the wires does not have to be stripped prior to termination, or soldered, or individually crimped.

M8 Straight Connectors with Insulation Displacement Terminals:

#7809, Male 3-Pin shown with spares that are included with these connectors.

Remove the required seal.

Fully tighten seal and replace when worn.

M12 Angled Connector with Insulation Displacement Terminals:

#7820, Female 8-Pin

Y-Splitter with M8 Connector

Quick#	Part#	Description	Price
8081	GSE-E12269	2x M8 3-pin female, 1x M8 4-pin Male	\$41.00

Combine two sensor cables to simplify I/O requirements.
