

Series 2003 Water Flow Regulators

2.6 GPM per zone maximum

3/4" NPT supply

Features:

- Individual circuit regulation valves to eliminate flow fluctuations
- Reference marks are molded into, not painted on, the sight glasses
- Internal composite floats along with external, adjustable sight glass tube rings
- 100% leak tested before shipping
- Each water flow regulator comes with a cleaning brush & tool
- 3/8" NPT to mold

Quick#	Part#	Number of Zones	Price
W077	WFR2-1	1	\$141.00
Options			
W084	WFR2 002Z	Z valve	\$210.00
W085	WFR2 002E	E valve	\$140.00
W086	WFR2 002D	Dry valve	\$115.00

Optional Valves Enhance Your Regulator's Performance

(for 2003 & 2008 series only)

Z-Valve (A) option allows several zones to be shut off if molding is interrupted. Saves water. Prevents unnecessary cool-down. 24 v. connection and water filter included.

E-Valve automatically shuts off flow to a specific zone to avoid over-cooling sensitive circuits.

The Dry-Out Valve (B) option allows complete clean-out of the Regulator and mold channels by compressed air. Special manifold block provided.
