## Vacuum gripping systems with foam / FGS-060 with fine pitch and self-closing valves

## FGS-060-0200-F20-OT-VA

- The FGS-060 series of vacuum gripping systems, in the version with foam, is a a modular and versatile solution for handling different products with different sizes, shapes and porosity
- Integrated EJ-LARGE-HF-3 multistage cartridges for high suction flow rate and low energy consumption
- The version with self-closing valves is ideal in applications where objects with different sizes/ shapes need to be handled. It allows the user to work with smaller vacuum pumps, reducing consumption while maintaining a high level of vacuum, even when most of the gripper surface area is not engaged

WTIC.
